About the ITNS Program:

Students will acquire the essential skills and information needed to install, configure, optimize, troubleshoot, repair, upgrade, and perform preventive maintenance on PCs, digital devices, and operating systems. Students will also learn networking concepts to help prepare for potential careers in network support or administration. Lastly, students will learn to evaluate and examine security policies, implement account management security controls, and how to utilize security measures to protect data and information.

By the end of the course, you will be able to understand:

- General IT Support
- Network Administration
- Cybersecurity Concepts

Course outcomes:

You will also have the training required for the following exams:

Exam vouchers are included for all students

- IT Fundamentals+
- CompTIA Network+
- CompTIA Security+
